Harvest

Plant factories, the last revolution of world agriculture, are plant growing facilities that provide high productivity in isolated environments, where continuous, healthy and eco-friendly agriculture can be realized.

COOLING EQUIPMENT

[Click for detailed information](#)

Production of all equipment under the same roof

Excellent material quality and insulation

Worldwide installation, service and warranty

Durability and functionality with excellent engineering

Cantek offers the most effective and efficient cooling solutions by making in-depth analyzes according to the expectations of the user, the products to be stored, the storage conditions and the geographical characteristics of the region. It has flexible production power that can meet all possible demands of users regarding cooling.

Cold Storage Panel

Cold Storage Lighting Leds

2000+ Units

Chillers - Cooling Groups
(Freon, NH3, CO2, Glycol, Propane)

Cold Storage Humidifier

Cold Storage Shelf Systems

EXCEPTIONAL ENERGY SAVING

Cantek Octopush technology with smart algorithm activates the compressor at a minimum level while keeping the cold room temperature constant. Thus, it provides exceptional energy saving.

In addition, you can remotely monitor and control your cold rooms and report values such as temperature and energy consumption.

FOOD CENTERS

[Click for detailed information](#)

Food centers are giant food facilities where food processing and storage are provided. Various food products are collected in a single platform and processed with modern methods before they are presented to end-users and economy as value-added products.

- ✓ The most effective food storage and processing solution for cities
- ✓ The right infrastructure for efficient use of food
- ✓ Attractive center for domestic and foreign investors
- ✓ Major food project for economic, social and political development

FOOD SECURITY

Everyone in the world has the right to have continuous access to economical, hygienic and various food.
